Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 6-11, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Farber et al. (WO 01/85151).

Farber discloses K252a compound on p. 7. See instant claims 6, 7. The recited function of the compound inherently exists in the same prior art compound. The reference also discloses topical lotion, cream, and gel formulations comprising a NGF inhibitor in a vehicle/excipient, wherein the NGF inhibitor is K252a. See p.7-15; instant claims 8-10 and 14. Farber also discloses a method of treating psoriasis by topically administering the compositions comprising K252 compounds. See p. 5, line 24-p. 6, line 4; instant claims 11, 13.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Farber as applied to claims 1-11 and 13, and further in view of the reference.

Farber further teaches that phototherapy is typically used when topical treatments have failed. See p. 2, lines 17- 28. While the reference does not specifically teach to administer the topical composition comprising K252 compound to a subject of PUVA or photodynamic treatment, it is viewed obvious that a skilled artisan would have been motivated to employ the Farber method to treat psoriasis patients who had been unsuccessful with the previously known methods and undergoes or has undergone photodynamic treatment.

Conclusion

No claims are allowed.
